

Web Design Scenario
Computer Science 20 / 30

Instructions:

Make sure you read the **Basics of Web Design** booklet prior to beginning this assignment.

Read the scenario below. Design the website.

Scenario:

A major company in town, **Little Pine Tourism Incorporated** would like you to design them a new website. You and your web development company must come up with a plan that will satisfy the company's needs.

Little Pine Tourism Inc would like to have customers find useful information about the company history, schedules for flights, types of tours to different parts of Canada and the world.

The CEO of the company would like to have a page for customers to contact customer service with any questions that they may have.

Your Job:

Using one sheet of blank paper per page, design 5 major pages in Little Pine Tourism's website.

1. "Home" Page / main site
2. Company History
3. Contact Us
4. Page of your choice # 1
5. Page of your choice # 2

You are sketching how you would propose that the website should look. Use the design principles from the notes to help guide your decisions about that the site should look.

Draw the pages using an entire sheet of paper. Label different features for clarification. As shown in the example on the back of this page. Your pages will use your own design.

Note: There is no wrong answer. I want you to think outside the box and come up with unique site designs. Remember, the entire page should be consistent in look.

➔ **Check out other tourism website to get some ideas.**

Due: End of class, Tuesday, March 17, 2015.
